본 시험지는 2026학년도 고1 6월 모의고사 31~40번 변형 문제집에서 발췌·재구성되었습니다.

빠른 정답은 마지막 페이지에 수록되어 있습니다.

31번 지문

Our world is not just interconnected, but ever-changing, even if we can't sense it. While you're reading this, you're changing. You're aging (a minute amount, thankfully), but the neural networks in your brain are also imperceptibly changing as you perceive each word. Crucially, even when we're seemingly not doing anything of note, events are taking place outside your immediate surroundings that will change your life in the future, though you won't realize it yet. Heraclitus, the ancient Greek philosopher, rightly pointed out, "No man ever steps in the same river twice. For it's not the same river and he's not the same man." To that, Cratylus, a student of Heraclitus, added that we are not mere passive observers. When you step in a river, you change it. Nothing is static. Even microscopic changes add up over time.

1. 다음 글의 주제로 가장 적절한 것은?

- ① the world and even ourselves are constantly changing, and we actively participate in that change rather than just observing it
- ② the human brain never changes throughout life
- ③ ancient Greek philosophy has no relevance today
- ④ rivers are the only thing that change over time
- ⑤ events outside our awareness have no effect on our future

2. 다음 글의 제목으로 가장 적절한 것은?

- ① Nothing Stays the Same: We Are Part of the Change
- ② The History of Ancient Greek Philosophy
- ③ Why Rivers Are Always the Same
- ④ The Static Nature of the Human Brain
- ⑤ How to Stop Time From Passing

32번 지문

Do you always study in the same spot? Don't. If you study in different places, that helps create variety, and that rich experience can reinforce what you are learning. When several college students told us they did school work in different places rather than in some favorite nook, that habit reflected the research on learning. Numerous experiments have found that if learners simply study in at least two different places, they are more likely to recall the material. In one of the first such trials, two different groups studied a list of words. Some students returned to the same room twice while their counterparts spent the same amount of time divided between two locations. When asked to recall as many words on the list as possible, those who had moved around did far better. Variety creates rich association, even when those connections form in the background, totally outside of what we are consciously thinking.

3. 다음 글의 요지로 가장 적절한 것은?

- ① Studying in multiple different locations creates richer associations that improve recall, compared to always studying in one place.
- ② Studying in the same room twice always produces better recall than studying in two different rooms.
- ③ Variety in study location has no measurable effect on memory.
- ④ College students prefer studying in a single favorite location.
- ⑤ Conscious effort is required to benefit from changing study locations.

4. 다음 글에서 전체 흐름과 관계 없는 문장은?

① ② Do you always study in the same spot? Don't. If you study in different places, that helps create variety, and that rich experience can reinforce what you are learning. ③ Coffee shops have become popular places for students to study in recent years. ④ Numerous experiments have found that if learners simply study in at least two different places, they are more likely to recall the material. ⑤ Variety creates rich association, even when those connections form in the background.

- ①
- ②
- ③
- ④
- ⑤

33번 지문

Talking about what something smells like is the most basic way of talking about our olfactory experience, and even this most basic way of talking about smells is challenging. There are no words in the English language to describe smells in the same way in which "blue" or "green" describe colors. Instead, to talk about how something smells, we talk about the source of the odor. Things smell "flowery," "fruity," or "fishy." Furthermore, even the most familiar odors are difficult to identify when they are not experienced in their usual context. In one experiment the majority of participants was unable to name very common odors like beer, urine, roses, or motor oil. Obviously, even those who couldn't name any of these odors would drink the beer but not the urine or the motor oil. This is how evolution has shaped our brain: We respond to odors correctly in many different ways, but we are not well-equipped to talk about them.

5. 다음 글의 내용과 일치하지 않는 것은?

- ① English lacks dedicated words to describe smells the way "blue" describes a color.
- ② People typically describe smells by referring to their source, such as "flowery" or "fruity."
- ③ Most participants in the experiment could easily name common odors like beer and motor oil.
- ④ Familiar odors become harder to identify outside their usual context.
- ⑤ Humans respond to odors correctly even without being able to name them.

6. [논술형] 다음 질문에 대한 답을 본문에서 찾아 한 단어로 쓰시오. (본문의 단어를 변형 없이 그대로 사용할 것) [5.0점]

Q. What common substance, alongside beer, roses, and motor oil, was one of the odors many participants could not name in the experiment?

34번 지문

A particularly powerful way in which human beings adapt and adjust to their circumstances is by changing behaviors in light of the consequences that they yield. For instance, a child who gets praised by her teacher for doing an exercise correctly is likely to continue doing the exercise in that way. A dancer who feels that a particular conditioning exercise is not giving any results is likely to give that exercise up in favor of another one that seems more promising. In general, we tend to do things that bring us some kind of benefit or act in ways that help us avoid some kind of problem, discomfort, or disadvantage. We also tend to do fewer things (or stop doing things) that lead to problems, discomfort, or disadvantages and we tend to avoid acting in ways that do not bring any benefit or reward.

7. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

A particularly powerful way in which human beings adapt and adjust to their circumstances is by ①changing behaviors in light of the consequences that they yield. For instance, a child who gets praised by her teacher for doing an exercise correctly is likely to continue ②doing the exercise in that way. A dancer who feels that a particular conditioning exercise ③is not giving any results is likely to give that exercise up in favor of another one that seems more promising. In general, we tend ④do things that bring us some kind of benefit or act in ways that ⑤help us avoid some kind of problem, discomfort, or disadvantage.

① changing

② doing

③ is not giving

④ do things

⑤ help

8. 다음 글을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은? (34번 지문)

"People tend to (A)\_\_\_\_\_ behaviors that lead to benefits and (B)\_\_\_\_\_ those that lead to problems or discomfort."

① (A) repeat – (B) abandon

② (A) abandon – (B) repeat

③ (A) ignore – (B) celebrate

④ (A) forget – (B) memorize

⑤ (A) avoid – (B) embrace

35번 지문

It is evident through various case studies that adopting digital minimalism can lead to improved mental health outcomes. For instance, a study conducted by researchers at Stanford University found that participants who limited their use of social media and digital devices reported lower levels of stress, anxiety, and depression. By reducing the constant stream of information and notifications, individuals were able to focus more on meaningful interactions and activities that promoted well-being. ( ㉠ ) Additionally, participants reported relying on social media to get information for their purchasing decisions. ( ㉡ ) In another case, a corporate professional struggling with burnout and insomnia implemented digital minimalism techniques, such as setting boundaries for phone usage and practicing mindfulness. ( ㉢ ) As a result, he experienced improved sleep quality, reduced stress levels, and a newfound sense of calm and clarity. ( ㉣ ) ( ㉤ )

9. 다음 글에서 전체 흐름과 관계 없는 문장은?

- |   |   |
|---|---|
| ㉠ | ㉡ |
| ㉢ | ㉣ |
| ㉤ |   |

10. 다음 글의 빈칸에 들어갈 말로 가장 적절한 것은?

“In another case, a corporate professional struggling with burnout and insomnia implemented digital minimalism techniques, such as setting boundaries for phone usage and practicing mindfulness. As a result, \_\_\_\_\_.”

- ㉠ he experienced improved sleep quality, reduced stress levels, and a newfound sense of calm and clarity
- ㉡ his burnout and insomnia became significantly worse
- ㉢ he was forced to quit his job entirely
- ㉣ he increased his social media usage even further
- ㉤ his symptoms remained completely unchanged

36번 지문

The big difference between working and long-term memory is that we are explicitly aware of the information in working memory, but we are not able to directly access the information in our long-term memory.

(C) We access long-term memory by bringing the information into working memory. For example, right now you are not aware of all the actors you have ever seen. They are stored in your long-term memory outside your consciousness.

(B) However, if I asked you to list all the actors, you would use your working memory to retrieve them one by one and reel them off. Your working memory can access your long-term memory and bring those memories to awareness.

(A) But remember it has a limit of seven items or chunks. Each actor would be an item. Try and hold all the actors you know in your explicit awareness. You might try to visualize a large group of them. But you still would only be aware of a few actors at any one time.

13. 주어진 문장 다음에 이어질 글의 순서로 가장 적절한 것은?

- |               |               |
|---------------|---------------|
| ㉠ (A)-(B)-(C) | ㉡ (A)-(C)-(B) |
| ㉢ (B)-(C)-(A) | ㉣ (C)-(A)-(B) |
| ㉤ (C)-(B)-(A) |               |

14. 밑줄 친 it 이 가리키는 것으로 가장 적절한 것은?

"But remember it has a limit of seven items or chunks."

- ㉠ working memory
- ㉡ long-term memory
- ㉢ the list of actors
- ㉣ conscious awareness in general
- ㉤ the visualization technique

38번 지문

If you gesture while describing an event, do you think you'll be able to recall that event better than if you don't gesture? We had adults watch videos of toy objects, animals, and people performing various, sometimes odd, actions: a chicken sliding to a policeman, a jogger bending down to touch his toes, a fence swinging shut on its own. We then tested the adults' memories of these events immediately after the descriptions and three weeks later. ( ㉠ ) To see if we'd get the same effects if people gestured on their own, we did the study again, but this time we gave the adults no instructions about gesture. ( ㉡ ) We found the same patterns: people remembered items on which they had gestured spontaneously better than items on which they had not gestured. ( ㉢ ) Producing gesture along with speech makes the information encoded in that speech memorable. ( ㉣ )( ㉤ )

15. 다음 글에서 주어진 문장이 들어갈 위치로 가장 적절한 것은?

"Adults who were told to gesture while describing the events remembered more than adults who were told not to gesture, particularly several weeks later."

- |   |   |
|---|---|
| ① | ② |
| ③ | ④ |
| ⑤ |   |

16. 다음 글의 요지로 가장 적절한 것은?

- ① Both instructed and spontaneous gesturing while describing events leads to better memory recall than not gesturing.
- ② Gesture only helps memory when people are explicitly told to do it.
- ③ Memory recall is unaffected by whether a person gestures or not.
- ④ Spontaneous gesture impairs memory more than instructed gesture.
- ⑤ Watching odd actions in videos is more important than gesture for memory.

39번 지문

Approximately 15-20% of global greenhouse gas emissions are caused by degradation and deforestation. Trees play a huge role in the carbon cycle. They convert the CO<sub>2</sub> in the air to oxygen through the process of photosynthesis, and consequently, they are viewed as a natural regulator of carbon dioxide. ( ① ) The existence of a larger amount of trees will no doubt lead to the reduced presence of carbon dioxide in the atmosphere and the increased existence of oxygen. ( ② ) Unfortunately, deforestation is preventing this process from being fully accomplished. ( ③ ) With more carbon dioxide in the atmosphere, more of the sun's radiation is being reflected back to Earth instead of being released into space, and this is causing the planet's average temperature to rise. ( ④ ) Accordingly, deforestation is a major issue when it comes to global warming. ( ⑤ )

17. 다음 글에서 주어진 문장이 들어갈 위치로 가장 적절한 것은?

"And with half of the Earth's forests gone, the amount of carbon dioxide is progressively rising."

- |   |   |
|---|---|
| ① | ② |
| ③ | ④ |
| ⑤ |   |

18. 다음 글의 내용과 일치하지 않는 것은?

- ① About 15-20% of global greenhouse gas emissions come from degradation and deforestation.
- ② Trees convert carbon dioxide into oxygen through photosynthesis.
- ③ More trees would lead to higher carbon dioxide levels in the atmosphere.
- ④ Half of the Earth's forests have already been lost.
- ⑤ Rising atmospheric carbon dioxide is linked to higher average global temperatures.

40번 지문

We go out in the world every day and make decisions about what is safe or not and what is appropriate or not. It is what psychologist Joseph LeDoux has suggested is an unconscious "danger detector" that determines whether or not something or someone is safe before we can even begin to consciously make a determination. When the object, animal, or person is assessed to be dangerous, a fear response, which has been called "fight or flight," occurs. On a conscious level we may correct a mistake in this "danger detector" when we notice it, but often, of course, we simply begin to generate reasons for why it was accurate in the first place. We are generally convinced that our decisions are rational, but in reality, most human decisions are made emotionally, and then we collect or generate the facts to justify these decisions. When we see something or someone who "feels" dangerous, we have already launched into action internally before we have even started "thinking."

19. 다음 글을 요약한 문장이다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

"According to LeDoux, an unconscious (A)\_\_\_\_\_ assesses safety before we consciously decide, and we often (B)\_\_\_\_\_ our emotional decisions with reasons afterward."

- ① (A) danger detector – (B) justify
- ② (A) danger detector – (B) ignore
- ③ (A) rational thinker – (B) justify
- ④ (A) rational thinker – (B) forget
- ⑤ (A) memory system – (B) erase

20. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

It is what psychologist Joseph LeDoux has suggested is an unconscious "danger detector" that ①determines whether or not something or someone is safe before we can even begin to consciously make a determination. When the object, animal, or person is assessed to be dangerous, a fear response, which has been called "fight or flight," ②occurs. On a conscious level we may correct a mistake in this "danger detector" when we notice it, but often, of course, we simply begin to ③generate reasons for why it was accurate in the first place. We are generally convinced that our decisions are ④irrational, but in reality, most human decisions are made emotionally, and then we collect or generate the facts to ⑤justify these decisions.

- ① determines
- ② occurs
- ③ generate
- ④ irrational
- ⑤ justify
